M E M O R A N D U M

May 29, 1979

To: Sherwood Davies, Director - Bureau of Radiological Health
From: W.J. O'Brien - Buffalo Area Office *WJO*
Subject: Union Carbide - Niagara Falls

On Friday, May 25, 1979, I met with those listed below to discuss the slag behind Pine Bowl and Baia Pontiac.

Hugh O'Hear - Chemist

C.R. Allenbach - Manager, Environmental Health & Safety
(716/278-3490)

Paul J. Sitzenstatter - Production Engineer

Ray Simmons - Plant Superintendent

Address is: Union Carbide Corporation
Metals Division
137 - 47th Street
Niagara Falls, NY 14302

Telephone Number: 716/278-3331

These men were completely cooperative; they said I could look at any of their records. They could not imagine how this type slag (source material) could have been utilized in any of their production procedures. They accompanied me to pick up a sample for their lab to analyze in hopes of shedding more light on the matter.

They said they would have trucked such amounts in their own vehicles. They had trucked their own slag to their own dump.

They will cooperate in every way possible.
